

Dear Friend, liebe Freunde,

When the idea to organize a match in Treviso was born, nobody could imagine the actual situation about the Covid-19...

As per my previous open letter of March 14th, I didn't mean to give up, at least until there was hope to come back to normality soon.

You all know which is the situation in Europe and in Italy mostly: we are actually facing the infection peak and soon we imagine to enter the "phase 2", when the situation will move to a great reduction of the emergency.

I've heard on TV news that even the other European countries are in emergency then I hope you all are fine, such as your beloved.

Anyway, Italian government today has decreed to move on for all the next week with the shutdown to start reopening the factories the following weeks... unfortunately, sport activities still restricted at least to the first May weekend: the date of our match!

At this point, I have, together with the staff, to suspend the match and, at the same time, to inform you all in order to allow you to delete your reservations (if any).

BUT...

All is not lost!!!

Looking at the calendars (both the WA1500 and the TSN Treviso ones), we can propose the match with the same identical program for September 11th to 13th. The climate still sweet and the daylight will last enough for our purpose.

More than that, since the staff guys (many of which never faced PPC events) have get fascinated by our speciality, have already ask if for 2021 there may be another similar match; that means we can set up until now (or better, after the september "firing test") the next match to which you will heartly welcomes!

At this moment, the registration will be moved at the correspondant day and relay but, naturally, you could modify them all.

For the moment there is nothing more to do than to stay safe... I hope to see you all firstly at the European championships in Borek and, naturally, at the Treviso match!

A strong embrace to all!

Marco

Treviso, april 4th 2020
